Email: _____

Breed in development: _____

Breed status at the CCC: _____

Special clauses:

Introduction:

The general objectives of Chats Canada Cats in setting up the Acceleration Program are to allow the establishment in Canada of pure breeds to diversify the Canadian market and to perpetuate the establishment of these breeds in Canada.

To develop new breeders who will be supported, supervised, and directed toward the best breeding practices.

Limit the spread of inappropriate crosses and attempt to create new breeds that do not contribute anything to the species.

Bring these breeds under the *Animal Pedigree Act of Canada* to ensure the protection of these breeds, those who buy them, and those who produce them.

By signing this contract, the breeder understands and agrees to work towards these goals in a transparent manner and collaboration with Chats Canada Cats.

Commitment of the breeder:

- Import and develop one of the breeds identified by the CCC in Canada, with the aim of training breeders and making it known to the Canadian public;
- Agree to train, support, and sponsor, a minimum of 6 breeders among the candidates submitted by the CCC within 10 years of the contract;
- Not to sell breeding cats for crossbreeding without the prior and express permission of Chats Canada Cats;
- Produce champions of the developing breed;
- Sell competition/breeder quality cats of the target breed to sponsored breeders at preferential prices;
- Help form the breed club associated with the developed breed;
- Use a breeding stock sales contract approved by the CCC;
- Remain an active member of the CCC;
- Register all your cats at the CCC;
- Work with other breeders in the program to improve it.

To support the breeder-developer and the development of the new breed on the Canadian market, Chats Canada Cats is committed to:

- **If the breeder has produced a separate site** for the breed in development, the CCC offers package #2 for the first 3 years of membership in the program and package #3 for the next 7 years. The breeder is free to improve his package by paying the difference;
- Allow breeders-developers of the program to renew the courses Cattery Administration, from Mating to Weaning and Infectious Diseases and Parasites, free of charge, as often as they want;
- The CCC is committed to promoting the program:
 - Through the course Cattery Administration
 - On the CCC website and its various means of communication
 - During CCC's activities
- The CCC is committed to promoting new breeds developed:
 - Regularly on the various media platforms of the CCC;
 - During cat shows
- CCC support;
- Access to expert mentors;
- Identification (banner – logo) of participation in the Acceleration program;

In the event of a breach of contract:

Chats Canada Cats reserves the right to revoke all or part of the privileges granted under this Agreement.
