6

TAIL

- Rumpy / No tail
- Rumpy Riser / 1 to 3 sacral vertebrae at the end of the spine where some cartilage can be palpated. Most noticeable when the animal is raising its tail end.
- Stumpy / Having a partial tail of a few centimeters long composed of 1 to 3 caudal vertebrae. Between 1 to 2 inches long.
- Longy / Tail almost normal. From a stumpy to normal tail.

Can you see or do you have knowledge that the tail has been surgically altered?

Y N

If yes, are you the one who performed the alteration?

Y N
