NEWS RELEASE

FOR IMMEDIATE RELEASE

Terrebonne, March 25th, 2023 – Chats Canada Cats announced today partnership with SN Biomedical to promote Kidney-Chek.

The agreement brings together the largest Canadian cat organization and an innovative Canadian company that developed a simple and affordable home test to screen kidney function of pets.

Kidney-Chek is a revolutionary saliva test that screens for kidney disease in cats (and dogs) preventively. Not only is it non-invasive for your pet, but it's also an inexpensive option that you can use from home in between vet visits.

"This is excellent news for all cat breeders and pet owners in Canada. Chats Canada Cats which to promote and support innovation in feline research. Our organization is always looking for new and affordable tools for professional cat breeders to make sure they can provide the best of care." - says Michèle Ann Desaulniers, President of Chats Canada Cats.

About Chats Canada Cats

Chats Canada Cats is the first Canadian feline organization that seeks to officially operate under the Animal Pedigree Act. The CCC defends the rights of Canadian cat breeders but also believe that breeders must be objectively competent for this task.

The CCC wishes to provide cat breeders with more information regarding administrative issues as well as issues related to the reproduction of cats. Several accredited educational seminars will be offered by known associations based on their expertise.
