

SIAMESE

The ideal Siamese is medium in size, svelte, sinuous, elegant, extremely refined with long tapering line. Siamese possess a long, tapering wedge shape head which forms a triangle from the nose to the tips of the ears. There is no whisker pinch or nose dip. The eyes are almond-shape, slant towards the nose and are in harmony with the wedge. Generally, they are very tall on their legs. Their tail is long, tapered and whip-like. The coat is short and light.

I – BODY/CONFORMATION (25)

(12) BODY & NECK – Long and svelte. Medium in size with a balanced body. A distinctive combination of fine bones and firm muscles. Shoulders and hips continue the same sleek line of a tubular body. Hips never wider than the shoulders. Neck is long and slender.

(5) MUSCLE & TONE – Long tapering lines, very lithe with firm muscles. This abdomen is tight.

(5) LEGS & FEET – Long and slim. In proportion to body. Hind legs higher than front. Paws dainty, small and oval. Paws delicately extend line of legs.

(3) TAIL – Long. Thin at the base and tapering to a fine point.

II – HEAD (35)

(7) PROFILE – A long strait line is seen from top of head to tip of nose. No bulge is seen over eyes, or a dip evident in nose. Nose long and strait which continues to forehead without a break.

(6) WEDGE - MUZZLE – Wedge starts at nose and flares out in straight line to tips of ears, thus forming a triangle with no beak at the whiskers. When whiskers are smoothed back, underlying bone structure is apparent. Muzzle is fine and wedged shape.

(5) EARS – Strikingly large, pointed, wide at the base and continue the line of the wedge.

(10) EYES – Almond shape, medium size – neither protruding nor recessed. Slanting toward nose and in harmony with lines of wedge and ears.

(3) WIDTH BETWEEN EYES – No less than width of one eye.

(4) CHIN & JAW – Medium in size. Tip of chin lines up with tip of nose in same vertical plane. Chin neither receding nor protruding.

III – COAT TEXTURE/LENGTH (10)

Coat is short, fine textures, glossy and lying closely to body.

IV – COLOUR (25)

(15) COAT COLOUR – There must be uniform density of colouring with proper colour for the paw pads and nose leather.

(10) EYE COLOUR – Blue, preference is given to deep, even and brilliant colour.

V – CONDITION & BALANCE (5)

The cat must be hard and muscular with no indication of fat or emaciation. Good health and vitality is essential.

OBJECTIONS DEDUCT

Cobby, short, thick or flabby body	2-5
Short or thick neck	1-3
Short legs, heavy leg bones, large or round feet	2-5
Short or thick tail	1-3
